SUBJECT: Genetically Modified Foods

[Message]

Why is this country letting Seed Manufacturers Like Monsanto mess with genes in foods. I do not want **genectically** altered foods at **my** table but right now I have no choice. PLEASE give me a choice and make it mandontory for manufacturers to label their goods in accordance if it is GM foods or if it is natural.

I can't believe that the White House is serving Genectically Altered Foods to the President and his family. We do not know the long term effect that this kind of food will have on people. Will it make us get cancer, tumors, is it going to change our **genectic** makeup? I know it is a proven fact that the pollen produced by this GM food is toxic to the monarch butterfly. What else is it toxic to? We are not in an age where we can **mess** with GOD. If God wanted his corn to

92N-0139

C6303

withstand the spraying of roundup over the top of it he would have made it. We are people not GODS. We put a halt to cloning and in my opinion this is no better than cloning.

It is sad to me that 50 percent of Americas Soybeans last year was **Genectically** Modified and 35% of Corn. Do you have any Idea how many foods is made with Soybeans? The list goes on and on. It is good to see that a company like Gerber Baby Foods is making a stand and not letting any **genectically** altered foods be put in its baby foods. At least our newborns are safe. Let us all be safe and change the law on GM foods. EUROPE want even let it in their Country!!!!!!!!!!!!!!!!!!!!!!

Thanks, Byron Efird
